

The Future of AI-Powered HR

by

[SHRM Blog](#)

Artificial Intelligence (AI) for HR is still in its early stages, but it can provide new efficiencies and greater effectiveness around the fundamental human process of engaging with, training and retaining the most critical of all resources—people.

If you're an HR executive interested in how AI can benefit your company, you do not need to understand all of the precise details about the programs, technologies and applications that comprise AI. Instead you should think about AI from a business perspective.

Discover:

- How AI can help the HR function
- Three Broad Areas of Application for AI-Powered HR Processes
- What Needs to Be in Place to Make AI Work
